NOTICE OF OPPORTUNITY FOR PUBLIC COMMENT ON DRAFT CLEANUP AND ABATEMENT ORDER NO R3-2022-0016

*Si desea obtener información en español, póngase en contacto con
Monica Barricarte al (805) 549-3881*

NOTICE IS HEREBY GIVEN that the California Regional Water Quality Control Board, Central Coast Region (Central Coast Water Board) will accept written comments on the draft Cleanup and Abatement Order R3-2022-0016 (Draft CAO), which directs the County of San Luis Obispo (County) to clean up and abate the effects of waste discharges from the Los Osos Closed Landfill (Landfill).

All interested parties are required to submit their written comments to the Central Coast Water Board by 5:00 p.m. on August 1, 2022. Comments should be addressed to:

Jordan Haserot, Central Coast Water Board
895 Aerovista Place, Suite 101, San Luis Obispo County, CA 93401
Email: jordan.haserot@waterboards.ca.gov, Phone: (805) 542-4781

The Landfill has been regulated by waste discharge requirements since 1974. As reported in semiannual monitoring reports, groundwater monitoring has consistently shown the presence of solvents in groundwater directly downgradient from the Landfill since 1984. Trace to low levels of solvents also occur periodically in surface water samples collected within Warden Creek in the area influenced by groundwater subject to impacts from the Landfill. Warden Creek flows to Los Osos Creek which flows to the Morro Bay Estuary. Additional information about the Los Osos Landfill is available on the [Los Osos Closed Landfill GeoTracker webpage](#).
